

IMPORTANT * IMPORTANT * IMPORTANT * IMPORTANT *

Dear INTEX Helicobacter Pylori Test users,

Through the amendments of sensibility of the INTEX Helicobacter Pylori Test we would like to inform you about an important point in the test procedure:

*Dilute **5-10 µl** serum or whole blood sample into the sample well first and then add **3 drops** of dilution buffer. Avoid dropping any solution in the observation window.*

*Read the result within **15 minutes** after the addition of sample. Do not read results after 30 minutes.*

We kindly ask you to pay high attention to this matter during test procedure.

INTEX Pharmazeutica AG, CH – 4132 Muttenz
